ADRIENNE LEE

Born 1998, USA
Lives and works in New York City

BIO

Adrienne Lee (b. 1998) is an American artist whose work bridges the fields of art and neuroscience. Drawing from her academic background, she explores the intersections between visual expression and cognitive science, using her practice to investigate the relationship between perception, memory, and the mind. Her work has been exhibited internationally and is included in both public and institutional collections.

EDUCATION

2020 Davidson College, BA Studio Art (Honors); Minor in Neuroscience

EXHIBITIONS

2021 *On View*, National Institute of Neurological Disorders and Stroke, National Institutes Of Health, MD
